

BioteQ Environmental Technologies Inc.

BioteQ is an industrial water treatment company that applies innovative technologies to solve complex water problems, reducing environmental liabilities while generating revenue from wastewater. BioteQ is on the 2008 list of BC's fastest growing companies. David Kratochvil, President & COO is in Vancouver's Top 40 under 40 list. Nice work guys!

Pomarex Testimonial

"Since 2005, Pomarex has been our retained technology support provider; what continually impresses me about Pomarex is their responsiveness. If a critical issue comes up, they seem to be able to drop everything to ensure we are back to work quickly. They are also very proactive with maintenance of our systems which helps us to keep focused on growth.

When we have a requirement beyond just supporting our environment, they are extremely knowledgeable and diligent in researching things for us. As a global organization, Pomarex has enabled a higher degree of connectivity, access, file sharing and remote support for our satellite operations, than we would have expected.

We use Pomarex as a key advisor in all our major technology decisions, and have recommended Pomarex to several friends and associates.

Thanks Pomarex!"
